

Dr. Malcolm Ross
Managing Director - Generapharm Consulting
Basel, Switzerland

Dr. Malcolm Ross is the Managing Director of Generapharm-Consulting specialising in training, project management, formulation and analytical development and QA/GMP in the Pharmaceutical industry.

Malcolm holds a B.Pharm and Ph.D from London University, was a lecturer in Pharmacognosy at the Welsh School of Pharmacy and a visiting Senior Lecturer in the Dept. of Chemistry at Bar Ilan University.

With over 30 years experience in the Pharmaceutical industry, the last 15 at corporate level, Malcolm has been intimately involved in strategy planning and analysis, pipeline management and related activities. He has worked in the UK, Israel, U.S.A, Canada, Poland and Switzerland. In his early career these activities were primarily US driven but, more recently, specific to the European market place.

Technically, Malcolm specialized in the development of finished dosage forms from both the analytical and formulation aspects and was responsible for establishing R&D in several generic companies in different international environments. Experience ranges from small CRO style to large corporate structures with multilevel reporting. Malcolm has been responsible for the development of over 40 generic Rx formulations and several OTC formulations including a number of innovative products. He is an acknowledged expert in pharmaceutical analysis and has had responsibility in areas of QA including worldwide auditing, validation and technology transfer.

He has experience in Intellectual property issues within the pharmaceutical industry and project management techniques.

After establishing Generapharm he has been involved in training and consulting for a large number of companies, including major companies active in both the generic and innovator space.
