

Dr. SANDY EISEN

**Chief Medical Officer - Frontline Pharma Consulting
London, UK**

Dr. Eisen studied medicine at Cambridge University and at St Bartholomew's Hospital Medical School, London and qualified as a doctor in 1980. He is a fully registered UK Physician with a current GMC licence to practice, and postgraduate qualifications in surgery (Fellowship of the Royal College of Surgeons of London) and pharmaceutical medicine (MFPM RCP London).

Following 9 years' medical practice in UK hospitals, he has now spent 24 years working in senior government positions and senior management roles in the pharmaceutical industry. This includes time as a **UK and EU regulator at the MHRA and EMA**, where he worked on all types of products in all therapeutic areas. He especially focussed on CNS products and worked as a CHMP expert on new guidelines in this area. During this period he acquired a detailed **knowledge and understanding of EU pharmaceutical legislation, procedures, and drug safety and data requirements**, covering all types of pharmaceutical products including new and generic products, biologicals, medical devices and vaccines.

This experience provided a sound basis for his subsequent pharmaceutical industry career, initially as a consultant at PAREXEL International advising over 50 companies on their **development plans and providing regulatory strategy and troubleshooting** for all types of products including **NCEs, biologicals and devices in both Europe and the US**.

He joined Teva in 2005 as VP with responsibility for **EU regulatory, portfolio and medical affairs**. He then worked as **Chief Medical Officer for Teva Pharmaceuticals Europe** for 5 years with overarching responsibility for all medical affairs and clinical issues, including pharmacovigilance and drug safety. At Teva he worked on **innovative products, biosimilars and generics**. Although working again across all therapeutic areas, at Teva he maintained a **CNS** expertise as Teva has major marketed products for MS and Parkinson's disease.

In 2011 he left Teva to set up his company **Frontline Pharma Consulting** Ltd which provides regulatory, medical and clinical advice and consulting services to a wide variety of client companies in all therapeutic areas. He also provide interim medical management for the pharmaceutical industry which includes periods working as **Medical Director and Clinical Research Director for a leading EU Pharma Company**.
